uniracers™

(Super NES)

- Available: October 1994
- MSRP: \$49.95*

Nintendo of America Inc. has teamed with DMA Design, Ltd., designers of the award-winning *Lemmings* game, to create *Uniracers*, an endlessly entertaining racing game for the 16-bit Super Nintendo Entertainment System (Super NES).

Uniracers features amusingly animated unicycles that perform unique turns and gravity-defying jumps at record speed. The unicycles were designed using the powerful Silicon Graphics workstations and Alias Research Inc.'s graphics tools, the same combination behind the stunning special effects in "Terminator 2" and the dinosaurs in "Jurassic Park." The unicycles have unique personalities which provide hours of entertainment. Not only do they express joy at winning a race, but throw temper tantrums upon losing!

The game features 16 different unicycles each with more than 6,000 frames of animation allowing for fluid movement as the unicycles careen down abstractly geometric courses. Players are judged not only on their course time but also on the difficulty of stunts and trick maneuvers they can get the unicycles to perform. This side-scrolling game is for one or two players (split screen), and also features a tournament mode for exciting group play.
